

## TRANSPORTABLE PURIFICATION PLANT USING DECANTATION/ FLOCCULATION

Drinking water purification.

**Flow:** from 50 to 416 m<sup>3</sup>/ hour

### **Plant characteristics:**

Provide water purification for human consumption using a transportable purification plant with decantation/ flocculation. Adaptable for any volume and location

### **Advantages:**

- High chemical and mechanical resistance.
- High resistance to corrosion.
- Compact.
- Mobile.
- Can be expanded by modules.
- Simple to operate and maintain.
- Can be used to supplement or replace other water treatment processes.
- Low operation costs.
